Product description

HPE StoreOnce 3100 delivers entry-level disk-based backup and disaster recovery that is ideal for smaller remote or branch offices and data centers. This 1U backup system offers 5.5TB of usable capacity (8TB RAW) and speeds of up to 6.4 TB/hour with StoreOnce catalyst, allowing a full 25.6TB of backup to be completed in just 4 hours.

Product features

Feature	Description
Protecting remote offices	Provides a local backup target and an efficient deduplicated local data repository. On running a virtual server environment choose dedicated appliances such as the StoreOnce 3100 depending on the infrastructure, performance and management requirements of the remote office deployments.
Delivering reliable backup and restore	HPE understands the need for highly reliable, highly available data protection. Consequently HPE StoreOnce systems feature hardware RAID 5 on StoreOnce 3100 to reduce the risk of data loss due to disk failure.
